Terceiro Desafio

Texto Claro:

cryptography usually refers to encryption which is the process of converting ordinary information into unintelligible gibberish decryption is the reverse in other words moving from the unintelligible cipher text back to plain text a cipher is a pair of algorithms which create the encryption and there versing decryption the detailed operation of a cipher is controlled both by the algorithm and in each instance by a key this is a secret parameter ideally known only to the communicants before the modern era cryptography was concerned solely with message confidentiality in recent decades the field has expanded to include techniques for message integrity checking sender and receiver identity authentication and digital signatures this text is from wikipedia the next quiz uses permutation and the text fits perfectly in a rectangular area where the number of rows is greater than the number of columns it is also known that the word banana appears several times in the text
